SHORT TERM EXPERIENCE IN MINISTRY

**REACHING STUDENTS FOR
CHRIST**

SCO VISION

Our vision is to build students in South Africa into communities of disciples transformed by Jesus Christ, impacting the school, the university, the church and society for the glory of God

-SCO's vision is to bring South African students into a love relationship with Christ the King, who will change lives and transform our needy nation.

-To do this, SCO invites mature graduates to give a year of their lives to reach out to students in secondary and tertiary campuses throughout South Africa through the STEM programme.

THE APPEAL

Therefore why don't you take a year after your Diploma/Degree to sharpen your christian walk, get equipped for students ministry and be transformed for a life of service.

Stemmers have gone on to serve the Lord both in secular work, church and student ministry. The STEM year focuses on giving you varied experience in ministry...

WHAT'S IN FOR YOU?

Here is what you'll cover throughout the year

- Knowing Jesus and making Him known
- Discipleship Training in a student context...
- Preparing Bible Studies, equipping students to share the Good News
- Studying Ephesians – seeing how God's grace radically alters the way we live.
- Creation theology
- Developing an accountable relationship with your staff worker
- Raising support
- Knowing and understanding student ministry.
- Learning how to plan student ministry work
- Governance

STEM LIFE involves: Making disciples, giving training on small group bible study, evangelism, growing leaders, giving talks, helping a branch run a mission, Pastoral care.

MEET FOLKS WHO WERE THERE BEFORE YOU

"Serving in ministry gave me an opportunity to experience the joy of serving within my gifting. I guess if you are an eye, you should be more comfortable used for sight than for walking".

"Before I joined STEM, I lived for money, a big house, a car and social recognition. These had enslaved and proclaimed themselves as my joy and purpose of my life. They defined a path I should

have taken in my life. STEM gave me a fresh perspective and now I live to spread the gospel of Jesus Christ. I nearly missed God's call, in which case my life would have become a missed call"

"STEM familiarised me with God's caller-tune and my God's given gifts. The other thing I learnt through STEM was partnering with God's people. Before STEM I viewed raising funds for ministry as begging for money and later I acquired a healthier view of what fundraising is".

There are two partners in the work of the gospel. In the student ministry context, one is on campus, discipling students and the other is in the workplace raising support to keep the other on campus, thus fuelling the making of disciples.
